eloy@sdum.uminho.pt

TRANSFERENCIA DE CONTENIDOS ENTRE SISTEMAS

SWORD

SWORD

SWORD = Simple Web-service Offering Repository Deposit

Es un protocolo de interoperabilidad que facilita el depósito de recursos de sistemas remotos en repositorios o sistemas similares. De la misma manera que el protocolo HTTP permite que cualquier browser “comunique” con cualquier servidor Web, el SWORD permite que diferentes clientes comuniquen con repositorios.

SWORD v1, desarrollado en 2007, permitía a los clientes SWORD hacer un depósito en repositorios.

SWORD v2 fue desarrollado después a partir de esta funcionalidad, para permitir más interacción en los depósitos. Estas interacciones permiten que el contenido sea actualizado, substituido, o eliminado usando el mismo protocolo.

SWORD

SWORD es agnóstico respecto los recursos que puede depositar. O protocolo puede manejar registros de metadatos, registros de metadatos con objetos digitales, múltiples ficheros (file packages) o objetos complejos.

SWORD está implementado en las versiones normales de los principales softwares de repositorios, como DSpace, EPrints, Fedora, Invenio, Zentity, etc..

SWORD

Escenarios de aplicación de SWORD:

- Repositorio a Repositorio
- Sistema de Currículos/ Gestión de Investigación a Repositorio
- Revista/Editorial a Repositorio
- Aplicación de desktop de usuario (Word) a Repositorio
- Sistema de gestión de conferencias a Repositorio
- Deposito de conjuntos de publicaciones (bulk ingest)
- De equipamiento de laboratorio a Repositorio
- Autoría colaborativa (Ms SharePoint)

....

The screenshot shows a web browser window for the RepositoryUM deposit system at <http://repositoryum.sdum.uminho.pt/submit>. The page is titled 'Licença' (License). At the top, there are language links: francês, espanhol, and inglês. Below them are navigation links: Ficheiro, Editar, Ver, Favoritos, Ferramentas, and Ajuda. The main header features the RepositoryUM logo with a stylized star icon and the text 'RepositóriUM'. To the right of the logo are links for 'Universidade do Minho', 'Serviços de Documentação', 'Biblioteca Digital', and 'Catálogo Bibliográfico'. A 'Serviço de Ajuda' (Help Service) link is also present. The central content area contains several buttons: 'Descrever', 'Descrever', 'Carregar', 'Verificar', 'Licença' (highlighted in red), 'DeGóis' (disabled), and 'Completo'. A message in Portuguese reads: 'Último passo: Para podermos dar acesso, distribuir, reproduzir e converter o(s) documento(s) que depositou necessitamos da sua concordância. Por favor leia os termos da seguinte licença, e selecione um dos botões no fundo da página. Selecioneando "Conceder Licença" indica a sua concordância com os termos da mesma. (Mais ajuda...)' (Last step: To allow access, distribute, reproduce and convert the document(s) you deposited, we need your consent. Please read the following license terms, and select one of the buttons at the bottom of the page. Selecting "Concede License" indicates your agreement with the terms of the same. (More help...)). Below this, another message states: 'Se não conceder esta licença o seu depósito não será removido. O depósito fica na sua Área Pessoal onde posteriormente pode removê-lo do sistema ou terminá-lo concedendo a licença logo que esclareça quaisquer dúvida(s) que possa ter.' (If you do not grant this license, your deposit will not be removed. The deposit remains in your Personal Area where it can be removed from the system or terminated by granting the license as soon as you clarify any doubt(s) you may have.). The main text block is titled 'LICENÇA DE DISTRIBUIÇÃO NÃO-EXCLUSIVA' (Non-Exclusive Distribution License) and contains three points (a, b, c) detailing the terms of the license. At the bottom, there are two buttons: 'Conceder licença' (Grant license) and 'Não conceder licença' (Do not grant license).

Produção científica: Ciências Naturais

Integração com Currículos Degóis

Suporte

A integração destes dois sistemas implicou desenvolvimentos de ambas as partes para permitir maximizar os esforços dos utilizadores. Desta forma, quando um utilizador deposita um documento no repositório institucional, pode enviar os metadados desse registo para o seu currículo no DeGóis. O documento apenas existe no repositório, sendo referenciado através de uma hiperligação a partir do currículo.

Se por outro lado, o utilizador inserir um nova entrada no seu currículo, poderá associar a esse registo um documento que será enviado automaticamente para o repositório da sua instituição. Em ambas as situações, o utilizador deve apenas indicar as credenciais de acesso aos respectivos sistemas (currículo e repositório) para que o envio de informação seja formalizado.

Instruções básicas sobre a utilização da funcionalidade:

- Envio do Repositório para o Currículo Degóis
- Envio do Currículo Degóis para o Repositório

[Repositório Científico de Acesso Aberto de Portugal : uma ferramenta ao serviço...](#)

Autor(es): Moreira, João Mendes [CV](#) ; Carvalho, José [CV](#) ; Saraiça, Ricardo [CV](#) ; Rodrigues, Eloy [CV](#)
Data: 2010
Origem: Repositório Comum

Assunto(s): Repositórios; Repositories; Acesso livre; Open access

Descrição

A presente comunicação visa apresentar e dar a conhecer o projecto Repositório Científico de Acesso Aberto de Portugal (RCAAP) e respectiva evolução, desde a sua génese até à actualidade. Começando-se por fazer uma retrospectiva histórica do movimento OA em Portugal, passando pelas suas principais etapas e os seus resultados, e a evolução do projeto RCAAP. A descrição dos serviços disponibilizados no âmbito do RCAAP, nomeadamente, o portal de pesquisa, o validador de repositórios, o Serviço de Alojamento de Reppositórios Institucionais, o Repositório Comum, as integrações com outros sistemas (DeGóis e B-On), o Serviço de Apoio, os serviços de divulgação, disseminação e formação, quer na vertente do merchandising tradicional, quer na vertente Web 2.0- bem como a apresentação de vários indicadores que atestam a sua evolução francamente expressiva, constituem a componente central deste texto. Finalmente, apresentam-se algumas perspectivas de trabalho futuro a realizar durante o ano 2010 (destacando-se o projecto-piloto do repórtorio de dados científicos da Agência Brasileira de Desenvolvimento Científico - ABEDENCI, o projecto OpenAire, entre outros) e a identificação dos principais desafios esperados no médio/longo prazo. This paper aims to present and publicize the project Repositório Científico de Acesso Aberto de Portugal (Portugal Open Access Science Repository) – RCAAP, and its evolution from its origins to the present. After starting with an historical review of the OA movement in Portugal, the initial objectives and stages progress of the project RCAAP are then presented. The description of the services provided in RCAAP, including the search portal, the repository validator, the Hosting Services for Institutional Repositories, the Comum (S-C) Repository, integration with other systems (DeGóis and B-On), advertising, dissemination and training services, both on the traditional merchandising and Web 2.0, and the presentation of several indicators that demonstrate the significant evolution of the project is the central component of this text. Finally, prospects for future work to be undertaken during the year 2010 (in particular, the pilot on scientific data repositories, integration with the open access initiatives in Brazil and the European project OpenAire) are presented and the text concludes with the identification of the main challenges expected in the medium to long term.
